No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1992 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

Contents of Volume 58

NUMBER 1, JUNE 1992

EPIDEMIOLOGY STUDY

URSULA A. ACKERMANN-LIEBRICH, CHARLOTTE BRAUN, AND REGULA C. RAPP. Epidemiologic Analysis of an Environmental Disaster: The Schweizerhalle Experience 1

ENVIRONMENTAL HYGIENE

PAUL LUNDY AND MIRA BARER. Asbestos-Containing Materials in New York City Buildings 15

BIOLOGICAL MARKERS

JAN A. STAESSEN, GUIDO VYNCKE, ROBERT R. LAUWERYS, HARRY A. ROELS, HILDE G. CELIS, FRANÇOISE CLAEYS, FRANCIS DONDEYNE, ROBERT H. FAGARD, GEERT IDE, PAUL J. LIJNEN, DÉSIRÉ RONDIA, FRANCIS SARTOR, LUTGARDE B. THIJS, AND ANTOON K. AMERY. Transfer of Cadmium from a Sandy Acidic Soil to Man: A Population Study 25

IN VIVO STUDIES

FARHAD KHALIL-MANESH, HARVEY C. GONICK, ARTHUR COHEN, ENRICO BERGAMASCHI, AND ANTONIO MUTTI. Experimental Model of Lead Nephropathy. II. Effect of Removal from Lead Exposure and Chelation Treatment with Dimercaptosuccinic Acid (DMSA) 35

SHUICHI ADACHI, KEN KAWAMURA, KIKUZI KIMURA, AND KAZUO TAKEMOTO. Tumor Incidence Was Not Related to the Thickness of Visceral Pleural in Female Syrian Hamsters Intratracheally Administered Amphibole Asbestos or Manmade Fibers . . 55

IN VITRO STUDIES

ANNE JOHANSSON, TORE CURSTEDT, OMID RASOOL, CONNIE JARSTRAND, AND PER CAMNER. Macrophage Reaction in Rabbit Lung following Inhalation of Iron Chloride. 66

ANNE JOHANSSON, TORE CURSTEDT, OMID RASOOL, CONNIE JARSTRAND, AND PER CAMNER. Rabbit Lung after Combined Exposure to Soluble Cobalt and Trivalent Chromium 80

PATRICK G. COIN, VICTOR L. ROGGLI, AND ARNOLD R. BRODY. Deposition, Clearance, and Translocation of Chrysotile Asbestos from Peripheral and Central Regions of the Rat Lung 97

HIDEKAZU FUJIMAKI, NOBORU KATAYAMA, AND KAZUO WAKAMORI. Enhanced Histamine Release from Lung Mast Cells of Guinea Pigs Exposed to Sulfuric Acid Aerosols 117

NUMBER 2, AUGUST 1992

REVIEW

A. RUSSELL FLEGAL AND DONALD R. SMITH. Current Needs for Increased Accuracy and Precision in Measurements of Low Levels of Lead in Blood 125

HUMAN STUDIES

KAYE H. KILBURN AND RAPHAEL H. WARSHAW. Neurobehavioral Effects of Formaldehyde and Solvents on Histology Technicians: Repeated Testing across Time 134

ALAN H. STERN, NATALIE C. G. FREEMAN, PATRICIA PLEBAN, ROBERT R. BOESCH, THOMAS WAINMAN, TIMOTHY HOWELL, SAUL I. SHUPACK, BRANDEN B. JOHNSON, AND PAUL J. LIOY. Residential Exposure to Chromium Waste—Urine Biological Monitoring in Conjunction with Environmental Exposure Monitoring . . . 147

ABIDA K. HAQUE, MELODEE G. MANCUSO, MARION G. WILLIAMS, AND RONALD F. DODSON. Asbestos in Organs and Placenta of Five Stillborn Infants Suggests Transplacental Transfer . . . 163

RAFFAELE MOLININI, LUIGI PAOLETTI, MICHELE ALBRIZIO, ANTONIO PENNELLA, FRANCESCO NARDULLI, AND GILDA CARUSO. Occupational Exposure to Asbestos and Urinary Bladder Cancer 176

EPIDEMIOLOGY STUDIES

RONALD P. CODY, CLIFFORD P. WEISEL, GLENN BIRNBAUM, AND PAUL J. LIOY. The Effect of Ozone Associated with Summertime Photochemical Smog and the Frequency of Asthma Visits to Hospital Emergency Departments 184

STUART M. BROOKS, HEATHER G. STOCKWELL, PATRICIA A. PINKHAM, ADAM W. ARMSTRONG, AND DOUGLAS A. WITTER. Sugarcane Exposure and the Risk of Lung Cancer and Mesothelioma 195

MICHAEL R. RANSOM AND C. ARDEN POPE III. Elementary School Absences and PM_{10} Pollution in Utah Valley 204

IN VIVO STUDY

HIROYUKI NAKAMURA, AKIYUKI KATOH, SEIICHI NOHARA, HIDEKI NAKAMURA, AND AKIRA OKADA. Experimental Studies on the Pathogenesis of the Gastric Mucosal Lesions Induced by Whole-Body Vibration 220

IN VITRO STUDIES

Crispin H. Pierce and Thomas N. Tozer. Styrene in Adipose Tissue of Nonoccupationally Exposed Persons 230

Johan Luthman, Agneta Oskarsson, Lars Olson, and Barry Hoffer. Postnatal Lead Exposure Affects Motor Skills and Exploratory Behavior in Rats 236

Author Index for Volume 58 253

NOTICE

The Subject Index for Volume 58 will appear in the December 1992 issue as part of a cumulative index for the year 1992.

INSTRUCTIONS TO AUTHORS

Manuscripts. Environmental Research publishes original reports describing studies of the toxic effects of environmental agents in humans and animals. The principal aims of the journal are to define the etiology of environmentally induced illness, and to increase understanding of the mechanisms by which environmental agents cause disease.

The study of environmental health is inherently multidisciplinary. Therefore, the journal welcomes relevant articles in:

- epidemiology and risk analysis
- toxicology
- environmental and occupational medicine
- the neurosciences
- pathology
- pharmacology
- reproductive biology
- biochemistry
- molecular and cellular biology
- mineralogy

Reports which bridge one or more of these disciplines will be particularly encouraged, as will studies employing biological markers of toxic exposure and effect.

Occasional critical reviews and selected book reviews will be included.

Submission of Manuscripts. Three copies (an original and two copies) should be submitted to:

Environmental Research
Editorial Offices
Division of Environmental and Occupational Medicine
Department of Community Medicine
Mount Sinai School of Medicine
1 Gustave L. Levy Place, Box 1057
New York, NY 10029

The original and two copies must include photocopies of all tables and figures.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Environmental Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All papers will be published in English.

Form of Manuscript. Manuscripts should be typewritten (not mimeographed) with double or triple spacing and wide margins on high-quality bond paper. Subdivision of the article into *Abstract* (50–200 words), *Introduction, Materials and Methods, Results, Discussion, Conclusions, Acknowledgments, and References* is recommended. In addition, section headings are often useful.

Page 1 of the manuscript should contain the article title, author's name, and affiliation (include zip code where applicable). Page 2 should contain a proposed running head of fewer than 40 characters and the address of the person to whom proofs are to be sent. Number all pages consecutively beginning with the title page. Include five descriptive key words for computer-aided searching.

Abbreviations. Follow the usage established by *Chemical Abstracts*. If others are utilized define on first use.

Figures. Number all figures consecutively with Arabic numerals; legends should be typed together on a separate sheet. Lettering on the original figures should be large enough to take a reduction of 50–60 percent. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8½ × 11 in. Grid lines that are to show in the photoreproduction should be inked in black. Photographs should be glossy prints (5 × 7 or 8 × 10 in.) with strong contrasts. X-rays should be right-reading glossy prints. Providing an overlay that indicates the most critical areas of halftones will aid in ensuring high-quality reproduction. Illustrations in color can be accepted only if the authors defray the cost.

Tables. Number all tables in order of appearance with Arabic numerals; type each table double-spaced on a separate page, including a short descriptive title typed double-spaced above the table. Footnotes to tables indicated by superscript lowercase letters, ^{a,b}, etc., should be typed double-spaced at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes. Text footnotes should be avoided whenever possible.

References. These are to be cited in the text by the author's name and year of publication. References should be listed alphabetically in an unnumbered list at the end of the paper in the following style:

Coleman, D. C., Reid, C. P. P., and Cole, C. V. (1983). Biological strategies of nutrient cycling in soil systems. *In* "Advances in Ecological Research" (A. MacFayden and E. D. Ford, Eds.), Vol. 13, pp. 1–55. Academic Press, New York/London.

Rice, E. L. (1984). "Allelopathy," 2nd ed. Academic Press, New York.

Takács, S., and Tatár, A. (1987). Trace elements in the environment and in human organs. I. Methods and results. *Environ. Res.* **42**, 312–320.

The names of journals should be abbreviated according to *Index Medicus,* 1980, or *Chemical Abstracts Service Source Index,* 1985. Include in the reference list articles that are "in press," but "manuscript in preparation," "personal communication," and "unpublished observation" are to be avoided.

Reprints. A reprint order form will accompany the proofs. The corresponding author receives 50 reprints free of charge, and additional copies may be ordered.

Correspondence. Editorial correspondence concerning the manuscript should be addressed to:

Environmental Research
Editorial Offices
Division of Environmental and Occupational Medicine
Department of Community Medicine
Mount Sinai School of Medicine
1 Gustave L. Levy Place, Box 1057
New York, NY 10029

Correspondence concerning manuscripts in production and proofs should be addressed to:
